

World Book Week activity Monday:

Ocean pollution experiment

Set up your lovely clean ocean. You can use a jar or any clear container. Watch your fish/sea creatures swim around freely.

Add some rubbish and black food colouring to act as sewage and oil which can leak into the ocean

Key questions:

What do you notice?

How different does your ocean look?

How does this effect sea creatures?

Which would you rather swim in?

How can we help to fix it?
