

Adding Fractions which have the same denominators

1. $\frac{1}{2} + \frac{1}{2} =$

6. $\frac{2}{11} + \frac{3}{11} =$

2. $\frac{3}{5} + \frac{1}{5} =$

7. $\frac{4}{9} + \frac{3}{9} =$

3. $\frac{2}{7} + \frac{3}{7} =$

8. $\frac{1}{4} + \frac{1}{4} =$

4. $\frac{4}{8} + \frac{4}{8} =$

9. $\frac{3}{12} + \frac{7}{12} =$

5. $\frac{1}{6} + \frac{3}{6} =$

10. $\frac{8}{15} + \frac{4}{15} =$

Adding fractions which have different denominators

11. $\frac{5}{13} + \frac{7}{26} =$

14. $\frac{3}{7} + \frac{8}{14} =$

12. $\frac{9}{15} + \frac{9}{30} =$

15. $\frac{4}{9} + \frac{11}{27} =$

13. $\frac{7}{16} + \frac{5}{8} =$

16. $\frac{9}{10} + \frac{17}{40} =$

Adding fractions – trickier ones

17. $\frac{3}{4} + \frac{2}{5} =$

22. $\frac{1}{6} + \frac{1}{4} =$

18. $\frac{6}{10} + \frac{1}{4} =$

23. $\frac{1}{5} + \frac{2}{4} =$

19. $\frac{1}{3} + \frac{4}{5} =$

24. $\frac{5}{10} + \frac{2}{4} =$

20. $\frac{2}{3} + \frac{1}{4} =$

25. $\frac{2}{5} + \frac{1}{2} =$

21. $\frac{1}{2} + \frac{1}{5} =$

26. $\frac{2}{5} + \frac{1}{3} =$
